PROFILE

Sulyman Khalil – a passionate Front-End Developer pursuing BS in Software Engineering. Dedicated to crafting modern, responsive, and user-friendly web interfaces with clean code and creative design. Eager to contribute to real-world projects, grow through challenges, and make an impact as a developer.

PPRACTICAL WORK

LEARNING

- **HTML, CSS & JavaScript**: Built a strong foundation in semantic HTML, modern CSS, and JavaScript to create responsive and interactive web experiences.
- **React.js, Redux & TypeScript:** Skilled in component-based architecture, type-safe state management, and building scalable, maintainable SPAs.
- **Bootstrap & Tailwind CSS:** Experienced in crafting mobile-first, visually consistent, and fast UIs using modern CSS frameworks.
- **Git & GitHub:** Proficient in version control, branching, merging, and collaborative workflow using repositories.

PROJECTS

- **Countries Info App (JS):** Developed a responsive web app powered by REST API to fetch and display real-time country details.
- **Todo App (JS):** Created a task management app with Local Storage integration for persistent task saving and interactive UI.
- **Expense Tracker (JS, Tailwind CSS):** Built a responsive expense tracker showing income, expenses, & balance with dynamic updates.
- **Calculator (React.js):** Built a React calculator using hooks for smooth state handling and seamless user experience.
- **Recipe Finder (React.js, Bootstrap):** Developed an API-powered app to search and display recipes dynamically with clean Bootstrap styling.
