PROFILE

Sulyman Khalil – a motivated Web Developer currently chasing BS in Software Engineering. Capable in HTML, CSS, JavaScript, React.js & modern UI frameworks like Bootstrap, Tailwind CSS. Familiar with C++ basics & version control using GitHub. Where clean code meets creative design — building the future of the web. Open to roles where I can contribute, learn, and grow as a developer.

PPRACTICAL WORK

■ November, 2024 - August, 2025 | Learning

- **HTML & CSS, JavaScript**: Gained strong understanding of semantic HTML, modern CSS, and JavaScript (ES6+) to build responsive and interactive web pages.
- **React JS:** Learned component-based development, state management, and props to create dynamic single-page applications.
- **Bootstrap & Tailwind CSS:** Practiced using popular frameworks for faster, mobile-first, and visually consistent UI design.
- **Git & GitHub:** Acquired version control skills, including branching, merging, and collaboration through repositories.

■ Projects

- **Eid Project (HTML & CSS):** Built a fully responsive Eid greetings webpage using semantic HTML and modern CSS.
- **Testimonial Project (CSS Grid):** Designed a responsive testimonial layout showcasing deep use of CSS Grid.
- **Techno Web House (Bootstrap):** Developed a responsive company profile website for a software firm using Bootstrap.
- **Countries API Project (JavaScript):** Created a responsive app that fetches and displays details of countries using REST API.
- **Dojo Blog (React JS):** Built a responsive blog app with API integration allowing users to create and delete blogs.
