

Sulyman Khalil

Lahore, Pakistan | +92 370 7843216 | sulymankhalil.dev@gmail.com | in/sulymankhalil

Professional Summary

Turning complex problems into clean, fast and scalable frontend experiences. Software Engineer with 1+ year of experience, skilled in JavaScript (ES6+), TypeScript, React.js and Redux Toolkit with experience in scalable UI development, state management and API integration. Also building proficiency in WebRTC and FFmpeg for real-time video streaming.

Technical Skills

- Languages: HTML, CSS, JavaScript (ES6+) & TypeScript
- Frameworks & Libraries: React.js, Vue.js, Angular.js, Umi.js, Bootstrap, Tailwind CSS & Ant Design
- State Management: Redux Toolkit
- Video Streaming: WebRTC & FFmpeg
- AI-Assisted Development: Prompt Engineering, Code Generation using Claude & Cursor
- Additional Skills: API Integration, State management, UI/UX Implementation, i18n (Internationalization), Cross Browser Capability & Responsive Design

Professional Experience

MultiConnect Horizon Ltd. | Hong Kong • Remote

● Software Engineer (Full Time) | June 2025 – Present

- Leveraged AI tools to gain 2x development speed and contributed to real-world, client-facing production projects.
- Optimized reusable UI components for performance, responsiveness and cross-browser compatibility using React.js.
- Delivered impactful, user-centric frontend features that measurably improved overall user experience.
- Translated Figma designs into pixel-perfect, responsive interfaces with cross-team collaboration, cutting handoff friction.
- Consumed dynamic admin dashboard APIs to render real-time, config-driven UI, ensuring live data changes reflected instantly across the interface.

● Software Engineer (Intern) | April 2025 – May 2025

- Implemented i18n (Internationalization) to support multi-language functionality, expanding app accessibility for global users.
- Engineered role-based access control (RBAC) to manage user permissions across multiple dashboard modules.
- Leveraged Day.js for precise date/time handling across time-sensitive frontend features.

Key Projects

- AILH: Web platform for the Hong Kong University of Science and Technology connecting researchers, faculty and initiatives.
- Click n Wash App: On-demand car wash booking platform offering seamless scheduling, payments and service management for customers.
- Task Flow: React task management app with RBAC, i18n, priority scheduling, auto-overdue detection and smart task pipeline, built with Umi.js, Ant Design and Day.js.

Education

BS in Software Engineering

Note: Strong frontend foundation with hands-on system design and architecture study, exposure to video streaming technologies and diving deeper into AI.
